DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brett Valiquet on 10/24/2006.

The application has been amended as follows:

In claim 50:

In line 10, the phrase "after the image generation station" has been deleted.

In line 14 the phrase "ink adhering" has been replaced by "an ink application station wherein ink is applied which adheres"

In line 14, "is" has been inserted between the words "and" and "not"

In line 17, the word "and" has been deleted.

In line 19, the period has been changed to a semicolon.

The following lines have been added to the end of the claim:

"and

said fountain solution application station being located between said image generation station and said ink application station."

In claim 60:

In line 8, the phrase "after the image generation station" has been deleted.

In line 19, the period has been changed to a semicolon.

The following lines have been added to the end of the claim:

"and

said fountain solution application station being located between said image generation station and said ink application station."

2. The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor renders obvious a method to generate a print image on a carrier material, as claimed in claims 39 and 58, wherein a layer of dampening solution or fountain solution is applied onto the surface of the print carrier after the structuring process, in combination with the remaining claim elements. Further, the prior art of record neither discloses nor renders obvious a device to generate a print image on a carrier material, as claimed in claims 50 and 60, wherein a dampening station or fountain solution application station is located in between an image generation station and an ink application station, in combination with the remaining claim elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,125,755 to Link et al. and US 2005/0115424 to Wiedemer both describe a printing method and apparatus for generating a print image on a carrier using a laser to structure the carrier surface.
